**DETAILED ACTION**

1. The Amendment filed by Applicant on 10/23/2007 has been entered.

***Response to Amendment/Arguments***

2. Applicant's amendment and arguments filed on 10/23/2007 have been fully considered and they are found unpersuasive.

***Claim Rejections - 35 USC § 103***

3. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negatived by the manner in which the invention was made.

4. The factual inquiries set forth in *Graham v. John Deere Co.*, 383 U.S. 1, 148 USPQ 459 (1966), that are applied for establishing a background for determining obviousness under 35 U.S.C. 103(a) are summarized as follows:

1. Determining the scope and contents of the prior art.

Art Unit: 1796

2. Ascertaining the differences between the prior art and the claims at issue.
  3. Resolving the level of ordinary skill in the pertinent art.
  4. Considering objective evidence present in the application indicating obviousness or nonobviousness.
5. Claims 1-22 and 24 remain rejected under 35 U.S.C. 103(a) as being unpatentable over Chang et al., US 2003/0032352 A1 (hereinafter "Chang"). Chang teaches a method of preparing an effective ion-sensitive or triggable cationic polymer suitable for use in flushable or water-dispersible personal care products. See Chang, ¶¶ 0015-0030. Chang further teaches that the cationic polymer can be prepared in mixed solvent solution of water and acetone. See Chang, ¶ 0026. Chang further teaches heating the solvent solution and mixing solvent solution with various cationic monomers and hydrophobic monomers under free radical conditions. See Chang, ¶¶ 0017-0028. Chang further teaches removal of excess solvent. See Chang, Examples 1-3.
6. The basic requirements of prima facie case of obvious are: (1) there must be some suggestion or motivation, either in the reference themselves or in the knowledge generally available to one of ordinary skill in the art, to modify the reference or to combine reference teachings; (2) there must be a reasonable

Art Unit: 1796

expectation of success; (3) the prior art reference (or references when combined) must teach or suggest all the claim limitations. See MPEP 2143. "There are three possible sources for a motivation to combine references: the nature of the problem to be solved, the teachings of the prior art, and the knowledge of persons of ordinary skill in the art." See In re Rouffet, 149 F.3d 1350, 1357, 47 USPQ2d 1453, 1457-58 (Fed. Cir. 1998). Although Chang does not disclose in the working examples a solvent recycling step, based on the specification as a whole and the fact that the recycling step is merely an optimization of the process as a whole, a polymer chemist of ordinary skill in the art would be motivated to modify Chang by recycling the previously removed acetone. Such modification would be obvious because one would have a reasonable expectation of success that removed acetone as taught by Chang would be similarly useful and applicable as a recycled solvent. Therefore, claims 1-22 and 24 are deemed as being unpatentable over Chang.

7. The Examiner contends steps E and F are optimization steps and have no effect on the overall claimed process. The Applicant must provide data reveal the unexpected result as of completing steps E and F.

8. **THIS ACTION IS MADE FINAL.** Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

9. A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the mailing date of this final action.
